HAMARA BHARAT — INCREDIBLE INDIA!

1 Bharat has been known worldwide as a land of wise and heroic individuals.

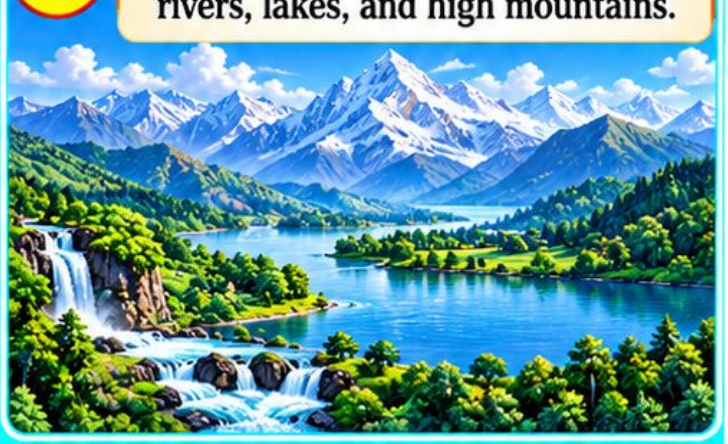

2 Its rich and diverse culture has attracted numerous travellers since ancient times.

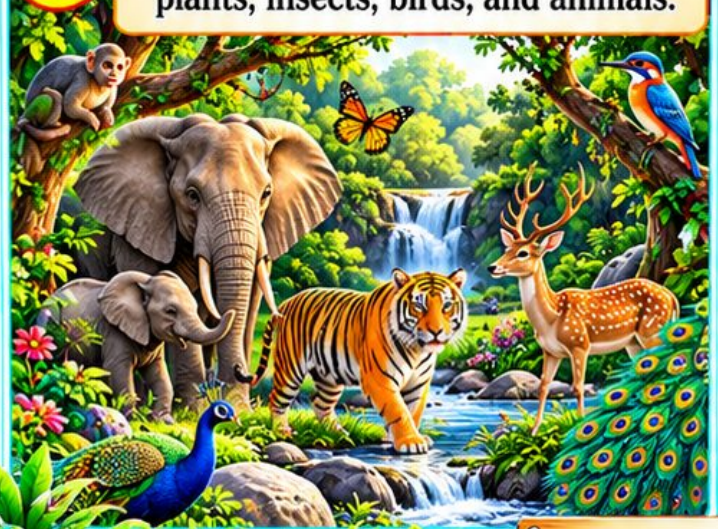

3 The people here live in unison, presenting to the world unity in diversity.

4 Bharat is a land rich with rivers, lakes, and high mountains.

5 Its green forests are home to many plants, insects, birds, and animals.

6 All these elements ensure that Bharat prospers and is respected globally.

HAMARA BHARAT — INCREDIBLE INDIA!

1 As its inhabitants, we need to continue working hard and make sure that it prospers.

HAMARA BHARAT – INCREDIBLE INDIA!

1 So, are you ready to meet your friends from all over the country?

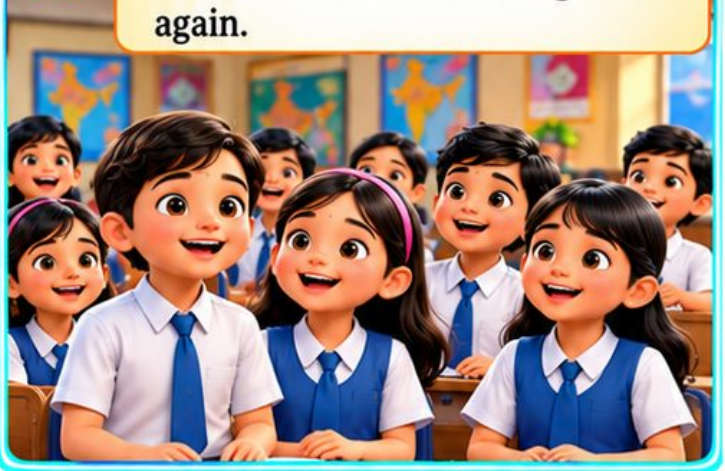

2 "Yes!" was the loud answer from the class.

3 "Can someone tell me for which programme are we here?"

4 "*Ek Bharat, Shreshtha Bharat*", the students answered together again.

5 "Please raise your hand to tell me what it is all about," the teacher said.

6 Many hands went up and some were jumping to answer.

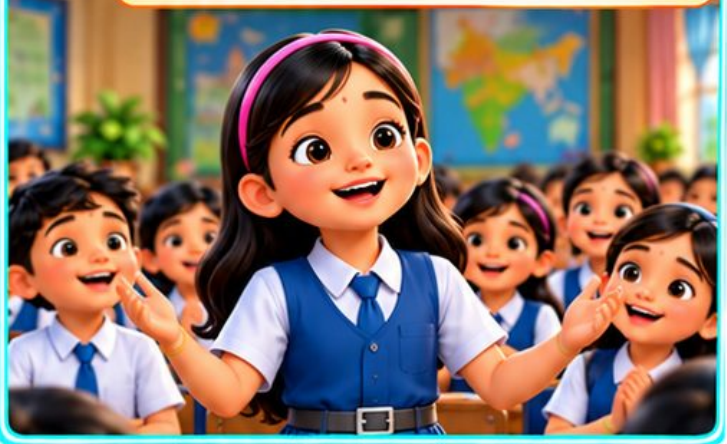

HAMARA BHARAT — INCREDIBLE INDIA!

1 The teacher asked Renu. With a smile on her face, she said,

2 "It is to know that we all belong to one nation and the bond we share.

3 And our unity in diversity makes us the most wonderful country in the world.

4

5 The teacher smiled at her as everyone clapped.

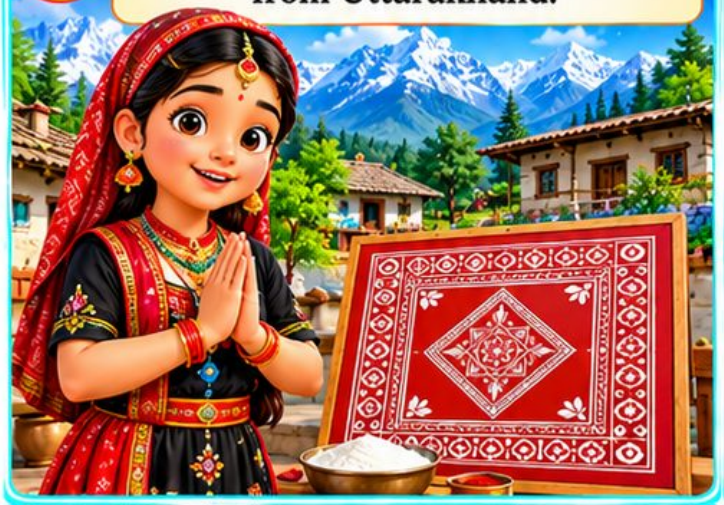

6 Just then, Bala pointed out, "Look! The video has started!"

KALAKRITIYON KA BHARAT

1 *Pranam!* I am Aakansha from Uttarakhand.

2 I am going to tell you about *Aipan*, our folk art, that we draw on family functions and festivals.

3 It is done with white rice flour paste on brick-red walls coloured with *geru*.

4 It is made on floors and walls of puja rooms, and outside the main door of the home.

5 It is an art form made by the women in the family.

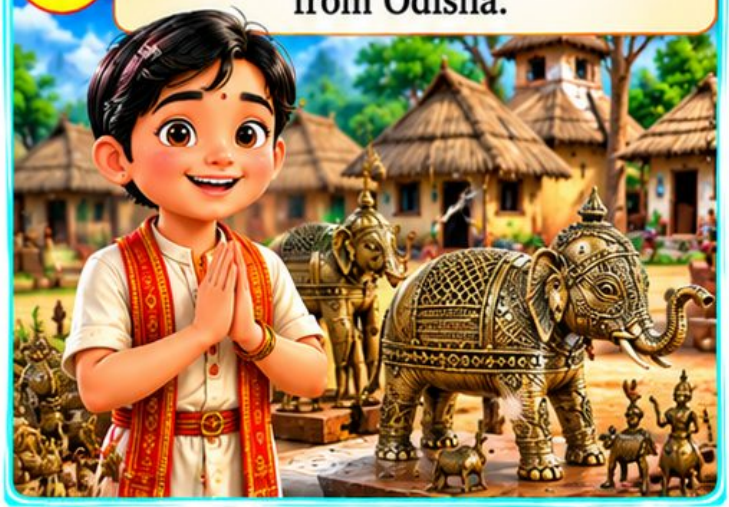

6 The designs are very beautiful and mathematical, and are based on our cultural traditions, and observations of nature.

KALAKRITIYON KA BHARAT

1 *Suprabhat!* I am Priyaranjan from Odisha.

2 My tribe practises a 4000-year-old metal craft named *Dhokra*.

3 To begin, we make a figure with clay, dry it, and cover it with a layer of wax.

4 Then, we carve the fine details on the wax.

5 After that, we cover the figure with clay, and put it in the fire. The wax melts and comes out of small openings.

6 Next, brass scrap is melted and poured into the empty space. The liquid metal takes the same shape as the wax.

1 *Suprabhaatam!* I am Chitra from Kerala. I want to tell you about coconut shell craft.

2 First, we clean the outside and inside of a brown coconut shell.

3 After that, we make it smooth by using sandpaper or a machine.

4 Then we give it the shape we want, and make it stable by fixing a base under it.

5 At last, we polish it using wood polish to make it shine.

6 We make household things like bowls and even jewellery from the coconut shells. It is a biodegradable craft.

KALAKRITIYON KA BHARAT

1 *Subhodayam!* I am Balamurali from Andhra Pradesh.

2 I want to tell you about the 400-year-old art of making toys in my village, Kondapalli.

3 To make the toys, we take soft wood from the nearby hills.

4 After that, we carve each part of the toy separately.

5 Then, we use *makku*—a paste of tamarind seed powder and sawdust to join the pieces together.

6 Next, we add details and finish the toys. Finally, we use oil and water-colours or vegetable dyes and enamel paints to colour them. These toys are based on folk stories, animals, birds, bullock carts, rural life, etc.
